### How To Measure

Measure your body and then find the corresponding measurements on the chart. Garment measurements will vary depending on the intended fit of the item.

**Bust/Chest** - Start by placing a measuring tape around the largest part of your bust. The tape should be flat but not too snug.

**Waist** - Your natural waist lies between your bottom ribs and hip bones. This is usually around your belly button. To measure, relax your stomach and lie the tape measure flat around your waist. Allow 1/4" space to allow comfort.

**Hip** - For the most accurate measurement, find the widest point of your hips and place the measuring tape around.
